Maimaiti Aimaier

Full-Stack Tech Lead Engineer

美国 德州 欧文

个人简介

Accomplished, reliable, and resourceful software developer with seven years of experience specializing in Java, microservices, and web application development. Proven track record of developing scalable, reusable, and secure software while maintaining performance standards in compliance with industry best practices. Extensive hands-on experience in containerization, cloud services (AWS, Azure), and data security. Adept at leading teams, mentoring engineers, and collaborating with cross-functional stakeholders.

My commitment to mentoring echoes in the growth of both senior and mid-level engineers, empowering them with best practices in Java and JavaScript. We have successfully tackled complex technical challenges and defined requirements with stakeholders, ensuring the delivery of high-quality solutions that meet the dynamic needs of our clients.

工作经历

TEKsystems

Full-Stack Tech Lead Engineer

2025 年 3 月 - Present (1 年 6 个月)

- Drove the modernization of the NICE Actimize financial-crime platform by designing and building custom Java plug-ins and companion Spring Boot microservices to extend detection models and enrich case data.
- Accelerated development velocity by integrating and utilizing GitHub Copilot daily within VS Code and IntelliJ, demonstrating proficiency with AI-assisted coding tools.
- Defined and enforced API standards for secure REST APIs and batch jobs, ensuring cross-functional alignment and seamless integration with downstream systems.
- Provided technical leadership and mentorship for production systems, managing high-severity incidents and deploying fixes while establishing observability best practices to minimize downtime.

- Drove Agile delivery practices, ensuring engineering goals remain aligned with business priorities.

BNSF Railway

Full-Stack Tech Lead Engineer

2023 年 1 月 - 2024 年 12 月 (2 年)

Dallas, Texas, United States

Responsibilities & achievements:

- Developed backend REST API applications and integrated with other REST APIs and services.
- Worked on Azure, Openshift Cloud Services, implemented Azure DB connection by using Azure API and Databricks.
- Led the modernization of legacy applications by implementing REST APIs and Cloud services.
- Mentored senior and mid-level software engineers, providing guidance on best practices in Java and JavaScript development.
- Collaborated with stakeholders to define technical requirements and lead the development team in implementing solutions.

Achievement:

As a Tech Lead at Infosys, I spearheaded the modernization of a legacy system, implementing cloud-native microservices using Azure, Docker. This transformation significantly improved system scalability and reliability, directly addressing the company's need for a robust and future-proof infrastructure. My strategic leadership not only streamlined operations but also resulted in more efficient project delivery and improved product quality.

Cognizant

Full Stack Engineer

2020 年 3 月 - 2022 年 11 月 (2 年 9 个月)

Irving, Texas, United States

Responsibilities & achievements:

- Owned and developed backend APIs for microservices architecture, ensuring seamless integration.
- Built and maintained interactive UI components using React.js, HTML5, CSS3, and JavaScript.
- Worked on Azure, AWS Cloud Services, resolved security issues and production issues.
- Worked with a variety of team setups to collaborate and ensure the code delivery.

- Implemented UI and backend JUnit test cases, made sure test coverage is more than 90%. Increased best practices and efficient code.
- Developed and consumed large-scale web services and high scale distributed systems.
- Collaborated with stakeholders to define technical requirements and lead the development team in implementing solutions.

Verizon Enterprise Solutions

Full Stack Engineer

2019 年 2 月 - 2020 年 2 月 (1 年 1 个月)

Dallas/Fort Worth Area

Responsibilities:

- Developed front-end web pages using React, HTML5, CSS3, and JavaScript in collaboration with UI designers.
- Designed and implemented Microservices and RESTful APIs using Spring Boot and AWS.
- Managed deployment and scaling of applications using AWS ECS, EC2, S3, Lambda.
- Led the integration of NoSQL databases like MongoDB to handle large data volumes efficiently.
- Used Rest methodology for the service layer interface and used JSON for the data transformation
- Analysis and bug fixing of the production problems and defects along with enhancements.
- Used JIRA for tracking the project user stories in Agile methodology. Involved in agile planning & Estimation Sessions of user stories. Participated in Scrum Meetings to update status daily.
- Followed Agile methodology and participated in Sprints during development.

Citi

Full Stack Engineer

2017 年 10 月 - 2019 年 1 月 (1 年 4 个月)

Dallas/Fort Worth Area

Responsibilities:

- Designed and developed web applications using Spring Boot and AJAX.
- Developed and consumed RESTful web services for data exchange using JSON.
- Worked with HTML5, HTML, DHTML, CSS, JAVASCRIPT, JSON, Angular(4,5) in UI pages. Designed and Developed Business Process layer components and integrated with Spring framework.

- Utilized Angular and JavaScript for UI development and integrated with Spring framework for backend services.

教育经历

新疆大学

Bachelor's Degree, Computer Science · (2011 - 2016)
