## SUMMARY

AI Engineer specializing in LLM systems — **LangChain**, **LiveKit**, **LangGraph** and RAG pipelines. Built and deployed LLM agents, FAISS-based vector search, and real-time voice AI, backed by strong **DSA fundamentals**. Focused on shipping production-ready AI systems, not just prototypes.

## SKILLS

### AI & LLM

LangChain, LangGraph, RAG, FAISS, LiveKit, Prompt Engineering, Vector Embeddings, Whisper, Semantic Search

### Data Structures & Algorithms

Python, Arrays, Linked Lists, Trees, Graphs, Recursion, Sliding Window, Dynamic Programming, Time/Space Complexity

### DB & Backend

FAST APIs, .NET Core (C#), Python, SQL Server, RESTful APIs, Vector DB

### Tools & Deployment

Git/GitHub, HuggingFace Spaces, Streamlit, Docker, VS Code, Vercel, LiveKit Cloud

## PROJECTS

### RepoMind AI 🔗

A FastAPI-based RAG system that ingests any GitHub repo, chunks code by function/class via AST parsing, and answers natural-language questions about the codebase using an LLM grounded strictly in retrieved code context.

### Video RAG System 🔗

Built an end-to-end RAG pipeline that automates scene detection and recap generation from raw video, reducing manual annotation effort by 100% with Integrated FAISS vector storage for sub-second semantic search.

### LiveDine AI Voice 🔗

Built a production-style multi-agent voice AI system (LiveKit, Groq, ElevenLabs) handling real-time restaurant reservations and orders with automatic failover across 3 TTS providers; deployed backend + frontend live on LiveKit Cloud and Vercel.

## PROFESSIONAL EXPERIENCE

### GEN AI Intern

Senarios

06/2026 – 07/2026

Lahore

Building real-time voice AI agents at **Senarios** using LiveKit, Groq (Whisper STT, Llama 3.3 70B), and Cartesia TTS, with Silero VAD for turn detection — debugged and deployed live agent pipelines end-to-end.

### AI Intern

Decode Labs 🔗

05/2026 – 07/2026

Contributed to Python-based AI development projects, working across the full pipeline from data handling and model integration to building and testing intelligent application features.

## EDUCATION

### BS Software Engineering

PUCIT

2023 – 2027

Coursework: Machine Learning · Data Structures & Algorithms, Web Engineering, Database Management, ASP.NET Core, AI

## CERTIFICATES

- Cognitive Class : Docker Essentials 🔗
- Hugging Face : Hugging Face Agents Course 🔗
- IBM : Prompt Engineering for Everyone 🔗
- Hugging Face : AI Agents Fundamentals 🔗
- DecodeLabs Internship: Artificial Intelligence 🔗
